

SmartFit In-Home Measuring Service

***Another Smart Service from WarmlyYours Radiant ...
How do you measure success?***

Smart Service for Smart People

Receive an in-home professional, error-free measurement at no cost to you – just another Smart Service from your friends at WarmlyYours Radiant.

If you're thinking of adding floor heating to your next remodeling project, then follow our philosophy – always begin with accuracy in mind.

With any floor-heating project, accurate measurements are a must, in order to start off your project on the right foot. To provide you with the best custom installation SmartPlan for your project, we want to ensure that you have the most precise measurements of the room(s) that you want to heat – also making your installation easier, exact, and efficient. That's why we named it, SmartFit.

The SmartFit service, in partnership with MeasureComp, utilizes a computerized drawing process to ensure that

requested areas are measured and all required information is obtained. Every area is scaled to the exact size while on site, minimizing the risk of errors.

If you're a Trade Professional, use this Smart Service to provide a value-added for your client-base. Make it easier to quote and add radiant heating to all of your clients' projects, when you offer your customers our complimentary SmartFit service. It's one more way we work to grow your business!

Measurement Accuracy

The complete SmartFit measurement readings provide everything you or your installer needs to know to ensure accuracy in your floor-heating project:

- Easy-to-read measurement plans with guaranteed accuracy
- Amount of material needed by yardage/square footage
- Details about existing floor conditions
- Wall footage in linear feet by area
- Floor heating thermostat location

Benefits

- Secure in-home service provided by bonded and biennially-screened professionals
- MeasureComp service, trusted and used by many prominent companies across the U.S.
- Next day appointments in most markets, using a real-time online calendar
- Large network of over 570 measure technicians currently servicing 49 states
- Quick response to requests and customization to fit your needs
- All plans are reviewed and signed for by you, to ensure that no areas are missed
